2. Purposes of Data Collection

BI GLOBAL BROKERS gathers, collects, stores, organizes, and retrieves information and data about users of the Services both collectively and individually. For example, we gather what areas of our websites users visit most frequently, what Services users access most often, and trends or patterns in responses to educational course questions.

BI GLOBAL BROKERS processes personal information both as a Processor and as a Controller as defined by the GDPR. BI GLOBAL BROKERS will be the Controller for user data. All data collected by BI GLOBAL BROKERS will be stored by blockchain. All hosting is performed in accordance with security regulations. BI GLOBAL BROKERS automatically logs IP addresses, session sources, and other data which tracks users' access to the Services. We analyze these logs for sales and marketing purposes, as well as for system performance monitoring. These logs are analyzed for the aggregate trends and patterns they reveal about users of the Services, not for the behaviors of individual users. This information provides us with aggregate data that BI GLOBAL BROKERS may use to improve the Services. BI GLOBAL BROKERS also gathers personal information about users of the Services individually, for example for provision of customer service and support, billing, security, compliance with the BI GLOBAL BROKERS Subscriber Agreement, network management, user surveys, sales management, sales support, newsletters, marketing, user group memberships, event registrations, sponsorships, offers of related products and services, and other exchanges of information.

We may also use the information you send to us to communicate with you via email, and possibly other means, regarding products, services, offers, promotions, or events we think may be of interest to you or to send you our newsletter, if this is in accordance with your marketing preferences. You will always be able to opt-out of such communications at any time through the processes outlined in section 5 below.
